PASSIVE RIOT & AGGRESSOR CONTROL

Riot equipment protection gear

Technical Specification

Riot Helmet

Fiberglass provides safety. No other available material equals the ability of fiberglass to absorb shock, resist penetration, and disperse energy. Also, fiberglass is not affected by common solvents and aging as are other materials.

Item : Riot Helmet / with high impact polycarbonate visor
Material : Hand laid fiberglass
Colours : Black, blue, green (others available)
Sizes : Adjustable to all sizes
Weight: : 980 grams

Standard Helmet:: High impact shock resistant Polycarbonate full face Visor with Neck protector pad.

Deluxe Helmet: Incorporating the above plus additional head padding and petrol seal.

Riot Shields

- 4mm thick polycarbonate
- Light weight
- Shatterproof
- High impact protection
- Absorbs shock
- Press-formed for added strength
- Protects against birdshot
- Designed to withstand rugged use
- Made in four sizes
- Non-corrosive fittings
- Attachments securely bolted for maximum strength
- High density foam rubber arm attachment provides added shock resistance

Sizes: 500mm x 600mm x 4mm. 600mm x 800mm x 4mm. 600mm x 1000mm x 4mm. 600mm x 1500mm x 4mm.

Straight Batons

Robust Poly-propylene

Sizes: 400mm x Ø34mm. 500mm x Ø34mm. 700mm x Ø34mm

Tonfa Batons & Baton Holders

Robust Poly-propylene

Size: 500 mm x Ø34mm. 600 mm x Ø34mm

Shoulders, Body and Groin protection

- High impact ABS plastics with inflammable and shock-resistant characteristics
- Plastic parts are backed by a high-density cross-linked polyethylene with shock-absorbing and shock-resistant characteristics for extra protection
- Webbing and Velcro fasteners riveted to moulding
- Adjustable fastening system for elasticity and comfortable fit
- For inner and outer clothing

Arm protection set

Offers elbow protection joined together with the arm protection manufactured from plastic material and padded with expendable polyethylene for shock absorption. Secured with straps and Velcro. Total weight 400 grams. Colour-Black.

Leg protection set

Kneecap and sheen guard joint together, manufactured from plastic material and padded with expendable polyethylene for shock absorption. Secured with straps and Velcro. Total weight 400 grams. Colour -Black.
